Dear Mark,

Mark,

Please share our appreciation with your team for the assistance and work they provided to get our roll line operational again!

Please pass my HUGE THANK YOU on to Ben! He was on the path to the stepper card and in the end it was the key.

Once he started thinking that was a high possibility we got one coming and when Dave got on today it pointed to the card even more once the voltages were confirmed.

Amazing what a small short can do!

If it wasn't such a needle in a haystack!!! Thanks to you and your team for getting us up and rolling.

Best regards,

Bob
